GLOSSARY

IM – Isolation Module – lighting module that comes in 3- or 4-Port configurations.

MM1 – Minute Mount® system.

MM2 – Minute Mount® 2 system.

Peculiar Light Kit – Light harnesses that are specific to a certain vehicle or headlamp type.

Peculiar Mount Kit – A vehicle-specific frame mount.

SEHP – Solenoid Electric Hydraulic Pack.

TBO – To Be Obsolete; once inventory is used up part will no longer be available.

OVERVIEW, TIPS AND IMPORTANT INFO

Using the Proposed Snowplow Swap Over sheet, gather all of the required information for both the current vehicle and the proposed vehicle. Once you have all of the vehicle information, you can use the following pages to verify whether the specific wiring and vehicle mounts will swap over or not. On the frame mount page, find the current truck and see if the proposed truck falls into the same mount category. If it does, then the plates will swap over; if not, find the proposed truck and order the appropriate mount. Next, find your truck in the wiring section to see if the two trucks are compatible, following the same procedure as the frame mounts. Note that in the relay applications, the headlamps on the snowplow may be different depending on the truck being worked on. If this is the case, both the truck and snowplow may need new harnesses.

Only current product will be shown in eMatch. If your vehicle is not listed, refer to the appropriate pages in this manual to find the necessary part numbers.

The MM1 will not fit on '07/'10 Toyota Tundra. There is a physical interference with the headgear and pushplates. MM2 headgear must be used in this application.

The MM1 will also have an interference issue with the '07/'10 GM trucks. The jack leg or air dam will need extensive modifications for proper fit.

If the snowplow being swapped to another vehicle has INTENSIFIRE™ headlamps, be aware that a headlamp extension bracket (29596) may be needed to avoid interference issues if the grille is part of the hood.

The HB-3/H11 and H13 headlamp connectors are not available in a relay style harness and IM wiring must be used.

Many of the newer vehicles may seem as though they will accept relay wiring, but in most cases will not function properly or may place too much amp draw on the OEM vehicle wiring.

While it is recommended that all vehicles manufactured after 1999 use the IM wiring system, some vehicles can be fitted with relay wiring for a number of years beyond this model year.

| Dodge 2500/3500 | 2002 & Prior |
| Jeep Wrangler | 2004 & Prior |

How to Identify Wiring Types and Hydraulics

Since the introduction of the Minute Mount® attachment system, we have introduced four unique wiring systems and five hydraulic systems. The wiring falls into four categories – 2-Plug Relay, 3-Plug 4-Port Isolation Module, 3-Plug 3-Port Isolation Module and 2-Plug Multiplexed Wiring with Isolation Module. There are several different ways to identify which wiring type is being used by looking under the hood of the vehicle for relays or a module or by the number of plugs on the snowplow. Relay wiring systems use hollow pins in the plugs whereas Isolation Module wiring uses solid pins.

Belt Driven Hydraulics – This system can be identified by the hydraulic components found under the hood of the vehicle. The valve may be under the hood or located on the headgear of the snowplow. There were two different wiring systems used with this style hydraulics, depending on the mounting type. On MM1 snowplows, there was a single 7-pin plug that used relays to automatically transfer the lights between the truck and snowplow. On conventional snowplows, there were two 4-pin harnesses that come through the grille to each headlamp and used a toggle switch in the cab of the truck to transfer the lights from truck to snowplow.

SEHP with Relay Wiring (Solenoid Electric Hydraulic Pak) – This is a self-contained electric over Hydraulic Power Pack. The lift cylinder is incorporated into the actual hydraulic unit. This system used a 2-plug relay system consisting of a 2-pin battery cable and a 9- or 12-pin control harness. The easiest way to identify a relay harness is the hollow pins on the snowplow side. Some later versions also used the 4-Port 3-Plug module wiring systems.

EC/SV – (Electric Clutch Solenoid Valve) – This system used a hydraulic pump that was belt driven and was engaged electrically. When engaged it provided fluid to a separate valve body that was operated by a joystick control. This system used the 2-plug relay system.

Insta-Act® Hydraulics – This unit can be identified by the lift cylinder being separate from the hydraulic unit. There are three different wiring systems used with this setup: 2-Plug Relay, 3-Plug 4-Port Module Wiring, 3-Plug 3-Port Module Wiring, 2-Plug 4-Port and 2-Plug 3 Port (HT Series™ snowplows).

Homesteader™ Hydraulic Units

Generation I

Generation II

HT Series™ Hydraulic Unit

Multiplexed Wiring (XtremeV™ & XLS™ Snowplows) – This unit can be identified by the inverted hydraulic unit with the fluid reservoir on top and the 4 piece cover. This system may have either the 2-Plug 4-Port Module Wiring or the 2-Plug 3-Port Module Wiring system.

Proposed Snowplow Swap Over

Use this chart to gather all of the required info needed to swap a snowplow from one truck to another. By filling out this form completely you can be assured that you will have all of the required info without any follow-up calls to the customer or to Fisher Engineering.

| | Current Truck | Proposed Truck |
|-------------------------|----------------------|----------------------|

* Model info may also include but not limited to – "All New" or Classic, tire size, trim level, etc.

** Information can be found on the driver-side door jamb – usually a white sticker

*** Can be found on the actual bulb or usually embossed on the headlamp lens

**** Relay or Isolation Module 3- or 4-Port – # of plugs

Transferring Existing Snowplow to Different Vehicle

| Current Truck | Proposed Truck |
|--|---|
| Straight Blade or EZ-V® MM1 with Relay Wiring | <p>Refer to Relay Harness Selection Guide to see if truck is relay compatible. If so, refer to Table 12.</p> <p>* If all of the wiring is removed from original truck, only the peculiar harness will be needed. Refer to peculiar attachment pages or eMatch to see if PP will swap over.</p> <p>If truck is not relay compatible, IM wiring must be used, refer to Table 8 or 9 and Table 1 of the wiring combinations pages.</p> <p>** See MM1 compatibility issues with the '07/'08 GM & Toyota applications on page 5.</p> |
| Straight Blade or EZ-V MM1 or MM2 with 4-Port Isolation Module Wiring | <p>Refer to Table 1 or 2 on the wiring combinations pages.</p> <p>* If removing all of the wiring from the original truck, refer to 4-port module parts list to order specific #3 & #4 harnesses. If harness for specific lights are not available, refer to the adapters chart – we provide adapters for all of the different headlamp types.</p> <p>** See MM1 compatibility issues with the '07/'08 GM & Toyota applications on page 5.</p> |
| Straight Blade or EZ-V MM1 or MM2 with 3-Port Isolation Module Wiring | <p>Enter truck data for both vehicles in eMatch to see if the same wiring harness and pushplates can be used. If kits are different, refer to the Quick Ordering Guide pages to find the correct peculiar light harness and pushplates or use the info generated from eMatch.</p> <p>** See MM1 compatibility issues with the '07/'08 GM & Toyota Tundra on page 5.</p> |
| HT Series™, XtremeV™ and XLS™ MM2 with 3-Port Isolation Module Wiring | <p>Enter truck data for both vehicles in eMatch to see if the same wiring harness and pushplates can be used. If kits are different, refer to the Quick Ordering Guide pages to find the correct peculiar light harness and pushplates or use the info generated from eMatch.</p> |

New Truck Side Only Setup – 3-Port Isolation Module System

For a MM1 or MM2 Straight Blade Application

| Table 1 | Qty | Part Number | Description |
|------------|-----|--------------|--|
| | 1 | | Peculiar mount kit (vehicle specific – see eMatch) |
| | 1 | | Peculiar wiring harness (vehicle specific – see eMatch) |
| | 1 | | 3-Port module (vehicle specific – see eMatch) |
| | 1 | 26705-1 | Vehicle side wiring kit – (includes 26346 EZ-V® vehicle control harness, 63411 vehicle battery cable, 22511 battery cable, 8291 plug cover, 5794K-1 motor relay, 27192K straight blade adapter and 8737 parts bag) |
| | 1 | 8292 or 9400 | Solenoid joystick control or hand-held Fish-Stik® control |

For a MM1 or MM2 EZ-V Application

| Table 2 | Qty | Part Number | Description |
|------------|-----|--------------|---|
| | 1 | | Peculiar mount kit (vehicle specific – see eMatch) |
| | 1 | | Peculiar wiring harness (vehicle specific – see eMatch) |
| | 1 | | 3-Port module (vehicle specific – see eMatch) |
| | 1 | 26705-1 | Vehicle side wiring kit – Isolation Module (includes 26346 EZ-V vehicle control harness, 63411 vehicle battery cable, 22511 battery cable, 8291 plug cover, 5794K-1 motor relay, 27192K straight blade adapter, and 8737 parts bag) |
| | 1 | 9800 or 9900 | Hand-held Fish-Stik or joystick control |

For an MM2 HT Series™, XtremeV™ or XLS™ Application

| Table 3 | Qty | Part Number | Description |
|------------|-----|----------------|---|
| | 1 | | Peculiar mount kit (vehicle specific – see eMatch) |
| | 1 | | Peculiar wiring harness (vehicle specific – see eMatch) |
| | 1 | | 3-Port module (vehicle specific – see eMatch) |
| | 1 | 42014 | Vehicle battery cable for HT Series, XLS and XtremeV snowplows |
| | 1 | 28587 | Vehicle control harness for HT Series, XLS and XtremeV snowplows |
| | 1 | 49900 or 29800 | Solenoid joystick control or hand-held Fish-Stik control |
| | 1 | 49700 or 49800 | Solenoid joystick control or hand-held control for HT Series™ snowplows |

How to Wire Truck with Central Hydraulics & Manual Valve Using Isolation Module Wiring

| Table 4 | Qty | Part Number | Description |
|--------------------|------------|--------------------|--|
| | 1 | | Peculiar mount kit (vehicle specific – see eMatch) |
| | 1 | | Peculiar light kit (vehicle specific – see eMatch) |
| | 1 | | 3-Port module (vehicle specific – see eMatch) |
| | 1 | 26498 | The 26498 harness replaces the vehicle control harness. This harness when wired will provide the module with power, ground and switched acc. power. |
| | 1 | 61169 | Only needed with 8435 headlamps. The plow side will also require a 21294 battery cable in order to provide a ground for the parking lights. 28800 does not require this cable. |

How to Wire Truck for Straight Blade, EZ-V®, HT Series™, XtremeV™ and XLS™ Snowplow Using 3-Port Wiring

| Table 5 | Qty | Part Number | Description |
|---|------------|--------------------|--|
| | 1 | | Peculiar mount kit (vehicle specific – see eMatch) |
| | 1 | | Peculiar light kit (vehicle specific – see eMatch) |
| | 1 | | 3-Port module (vehicle specific – see eMatch) |
| | 1 | 26705-1 | Vehicle side wiring kit – Isolation Module (includes 26345 EZ-V vehicle control harness, 63411 vehicle battery cable, 22511 battery cable, 8291 plug cover, 5794K-1 motor relay, 27192K straight blade adapter, 8737 parts bag and 29047 adapter) |
| | 1 | 42014 | Vehicle battery cable for XLS and XtremeV |
| | 1 | 28587 | Vehicle control harness for XLS and XtremeV |
| | 1 | TBD | Depending on blade series you will need to choose from an 8292 or 9400 for straight blades, 9800 or 9900 for EZ-V or 49900 or 29800 for XLS and XtremeV. For HT Series blades, choose from 49800 or 49700, both of which will also operate XLS and XtremeV blades. |
| Install all wiring with the 10-pin connector of the 26346 EZ-V vehicle control harness and the 4-pin connector of the 28587 vehicle control harness mounted next to the 4-pin connector of the B/C peculiar light harness. To use a straight blade or EZ-V snowplow, plug the 29047 adapter onto the 10-pin connector and plug into B/C harness. To use HT Series, XLS or XtremeV snowplow, plug the 4-pin connector of the 28587 into the 4-pin B/C connector. | | | |

How to Wire an HT Series™, XLS or XtremeV Snowplow on a 4-Port Module Wired Truck

| Table 6 | Qty | Part Number | Description |
|--|------------|--------------------|--|
| | 1 | 42014 | Vehicle Battery Cable for HT Series, XLS and XtremeV snowplows |
| | 1 | 28587 | Vehicle Control Harness for HT Series, XLS and XtremeV snowplows |
| | 1 | 29175 | 4-Pin and 10-Pin adapter |
| To use an HT Series, XLS or XtremeV snowplow, remove the existing 10-pin connector from port number 1. Plug the 29175 adapter on the 28587 vehicle control harness and insert in port number 1. To go back to straight blade or EZ-V application, remove the adapter from port number 1 and reinstall the original 10-pin connector. | | | |

How to Wire Truck for Straight Blade, EZ-V®, HT Series™, XtremeV™ and XLS™ Snowplow Using 4-Port Wiring

| Table 7 | Qty | Part Number | Description |
|---|-----|-------------|---|
| | 1 | | Peculiar mount kit (vehicle specific – see eMatch) |
| | 1 | | Peculiar light kit (vehicle specific – see eMatch) |
| | 1 | | 4-Port module (vehicle specific – see eMatch) |
| | 1 | 26705-1 | Vehicle side wiring kit – Isolation Module (includes 26346 EZ-V vehicle control harness, 63411 vehicle battery cable, 22511 battery cable, 8291 plug cover, 5794K-1 motor relay, 27192K straight blade adapter, 8737 parts bag and 29047 adapter) |
| | 1 | 42014 | Vehicle battery cable for HT Series, XLS and XtremeV snowplows |
| | 1 | 28587 | Vehicle control harness for HT Series, XLS and XtremeV snowplows |
| | 1 | 29175 | 4-Pin to 10-Pin adapter |
| | 1 | TBD | Depending on blade series you will need to choose from an 8292 or 9400 for straight blades, 9800 or 9900 for EZ-V or 49900 or 29800 for XLS and XtremeV snowplow. For HT Series blades, choose from 49800 or 49700, both of which will also operate XLS and XtremeV blades. |
| Install the 26705-1 as you normally would. Next install the vehicle battery cable and the vehicle control harness for the XtremeV and XLS blades with the 4-pin connector of the vehicle control harness within a few inches of port #1. Install the 29175 adapter on the 4-pin connector and verify it will reach port #1. To use an HT Series, XtremeV or XLS blade, remove the already installed 10-pin connector and insert the 10-pin connector of the 29175 adapter into the port. To switch back to the original wiring, remove the 29175 10-pin adapter and reinsert the original 26346 10-pin connector. | | | |

Plow Side Only Conversions – Relay Wiring to Isolation Module

MM1 or MM2 Straight Blade

| Table 8 | Qty | Part Number | Description |
|------------|------|-------------|--|
| | 1 | 26347 | P/N 26347 converts relay style lights to be isolation module compatible. Use this harness to rewire the snowplow headlamps. |
| | 1 | 26359 | Plow control harness |
| | **** | 28800 | INTENSIFIRE™ headlamps may also be used. If headgear only has one set of holes on each side, P/N 28330 headlamp adapter brackets will be required. |

MM1 or MM2 EZ-V Blade

| Table 9 | Qty | Part Number | Description |
|------------|------|-------------|---|
| | 1 | 26347 | P/N 26347 converts relay style lights to be isolation module compatible. Use this harness to rewire the snowplow headlamps. |
| | 1 | 26358 | Plow control harness |
| | **** | 28800 | INTENSIFIRE headlamps may also be used. If headgear only has one set of holes on each side, P/N 28330 headlamp adapter brackets will be required. |

How to Wire a Straight Blade Insta-Act® Hydraulic Unit on an MM1 or MM2 for Relay Style Wiring

| Table 10 | Qty | Part Number | Description |
|---|-----|-------------|--|
| | 1 | 8416-1 | 9-Pin Headlamps |
| | | 8417 | 12-Pin Headlamps |
| | 1 | 26497 | The 26497 is a kit that allows you to extend the wires on a non "-1" 8416 or with 8417 kit. On the MM headgear, the hydraulic unit sits on the passenger's side vs. the center with a SEHP |
| | 1 | 21294 | Plow Battery Cable |
| This conversion can be made with all 9- and 12-pin headlamps. Just extend the wires to the necessary distance. Depending on the vehicle, choose one of the headlamp types for that application. | | | |

How to Wire an EZ-V® Insta-Act Hydraulic Unit on an MM1 or MM2 for Relay Style Wiring

| Table 11 | Qty | Part Number | Description |
|-------------|-----|-------------|----------------------|
| | 1 | 8427 | Headlamp Kit, 12-Pin |
| | 1 | 66624 | Plow Battery Cable |

How to Wire a Truck for Relay Style Wiring

| Table 12 | Qty | Part Number | Description |
|-------------|-----|-------------|--|
| | 1 | | Peculiar Wiring Harness (Vehicle Specific – see KSG) |
| | 1 | | Peculiar Mount Kit (Vehicle Specific – see eMatch) |
| | 1 | 22393 | Relay Style Vehicle Side Wiring Kit – (includes 66610 vehicle control harness, 66623 vehicle battery cable, 5794K-1 motor relay, 22511 battery cable, 21792K adapter cable and 8737 parts bag) |

| Part Number Key | | |
|-----------------|-------------------------------|--|
| Part | Description | Use |
| 21792K | Control Adapter Cable | Allows use of straight blade control on truck wired for EZ-V blade |
| 26346 | 7-Pin Vehicle Control Harness | Control harness for EZ-V blade |
| 26498 | Vehicle Control Harness | Activates module system on Central Hydraulic trucks |
| 26705-1 | On-Truck Control Wiring Kit | Contains on-truck harness and cables needed to run straight and EZ-V blades (Dash one ["-1"] kit includes the 29047 adapter) |
| 28587 | Vehicle Control Harness | Control harness for XtremeV and XLS blades |
| 29047 | Adapter | Allows use of 3-port module system with straight and EZ-V blades (Found in 26705-1 and all 3-port harness kits) |
| 29175 | Adapter | Allows use of 4-port module with XtremeV and XLS blades |
| 42014 | Vehicle Battery Cable | Battery cable for XtremeV and XLS blades |
| 56496 | EZ-V Control Connector Bag | Contains 14-pin connector needed to connect EZ-V controls |

Common Adapters and Extension Harnesses

| Part # | Description | Function |
|----------|--|---|
| 29458 | HB-4 to H11 Connectors | Allows HE-3/HB-4 kits to be used on '07/'08 and newer GM & Toyota trucks. |
| 28027-2 | Inline Adapter Kit | This adapter is required for vehicles equipped with a 4-headlamp lighting system that illuminates the low <i>and</i> high beams when in high beam mode. This adapter prevents the low beams on the snowplow from illuminating when placed in high beam. |
| 26640 | 10-Pin Extension Harness | 100" extension harness for module wiring. |
| 26641-1 | 1A/2A Adapter | These adapters allow the 8436 or 29050 kit to be used on vehicles equipped with 1A/2A lighting. (The 8436 must be configured for HB-5). |
| 27968-1 | 2B to 2E Adapter Kit | These adapters allow the 8439 or 29051 kit to be used on vehicles equipped with 2E lighting. |
| 28860-1 | Mitsubishi Adapter | This adapter allows the 8436 or 29050 to be used on Mitsubishi trucks. The adapter converts the HB-5 connector to the 6-position connector used on Mitsubishi. (The 8436 must be configured for HB-5). |
| 29234 | 5-Position Connector to 2B | This kit allows the 29053 kit to be used on International trucks and the F-650 that have a 2B headlamp connector. |
| 29235 | 5-Position Connector to HB-5 | This kit allows the 29053 peculiar light kit to be used on International trucks and the F-650 that have a HB-5 headlamp connector. |
| 29056-1 | Dodge Sport Adapter | This kit allows a 29050 peculiar light kit to be used on the 4-light Dodge sport trucks. |
| 29033 | H13 Headlamp Adapter | This adapter allows all 7-, 9-, 11- and 12-pin headlamps to be wired for the H13 INTENSIFIRE™ headlamps. |
| B62225-1 | Adapter Kit H13-LF/UF | Allows the 29049 or 28400 peculiar light kit to be used on vehicles with LF/UF headlamps. |
| 29175 | 4-Port XtremeV™ / XLS™ Adapter | Allows the XtremeV and XLS to be used with 4-port wiring system. |
| 29047 | Adapter for 3-Port | Allows the 10-pin connector of the vehicle control harness to connect to the 4-pin connector on the peculiar light harness on all non-multiplex applications. |
| 21792K | 14-Pin EZ-V® Connector to 6-Pin Straight Blade Molex Connector | This adapter allows you to plug in and operate a straight blade on an EZ-V wired truck. |
| 21019K | Black 6-Pin to White 6-Pin Molex Connector | Allows the 8292 or 9400 control to be used as a replacement of the 7736 control. |
| 26497 | 9-Pin Harness Rework Kit | Allows the 8416 kit to be used on Insta-Act® units. This kit lengthens the wiring to reach the hydraulic unit that is located on the PS of the headgear. |
| 68508 | 4' Extension Harness | This is a 4' extension harness for the 7-pin spreader harness. |
| 68523 | 4' Extension Harness | This is a 4' extension harness for the spreader 2-pin battery cable. |
| 29420-1 | Adapter Kit H13-HB3/H11 | Allows the 29049 or 28400 peculiar light kit to be used on vehicles with H13-HB3/H11 headlamps. |
| 26636 | 10-Pin Extension Harness | 100" extension harness for module wiring. |

Common Adapters and Extension Harnesses

| Part # | Description | Function |
|---------|-------------------------------|---|
| 8695K | 4' Extension Harness | This is a 4' extension harness for the 6-pin Molex connector vehicle control harness. |
| 29294-1 | Adapter Kit | This adapter will allow you to test the 3-port module on the 26470-2 Isolation Module Tester. All 26470-1 and -2 kits already have this adapter included. |
| 66460 | 4' Extension Harness – 11-Pin | This is a 4' extension harness for the 11-pin spreader harness. |

Misc Adapters and Extension Brackets

| Part # | Description | Function |
|--------|--|--|
| 29035 | Headlamp Extension Bracket and Adapter Kit | This kit contains both the 28330 Headlamp Extension Bracket and the 29033 H13 wiring adapter for the INTENSIFIRE™ headlamps. |
| 28330 | Headlamp Extension Bracket (Extends to each side) | This bracket allows the use of the 2 post INTENSIFIRE headlamps on all conventional, MM1 and MM2 single headlamp post headgears. |
| 29596 | INTENSIFIRE Extension Bracket (Moves lights forward) | This bracket is needed in any application where the grille is part of the hood. It moves the headlamps forward for clearance between the back of the headlamps and the grille/hood. |
| 40734 | Extension Plate Kit | This kit allows the 31543 Homesteader™ mount for the Colorado/Canyon to be installed on the 2008 model year truck. There was an increase in vehicle height on the 2008 model year depending on the trim level. All 31543-1 kits contain this bracket. |
| 29614 | Adapter Kit – Ford Super Duty | This adapter kit allows the 7173 (Late 2004) to be converted into a 7159-2 kit to be used on all 1999-'04 Super Duty trucks. |
| 26273 | Dodge Sport Pkg Adapter Kit (Bracket) | Originally packed in the 8442 4-Port Kit for the 4-light Dodge Sport, this adapter kit helps pull the valance up and secure it to avoid interference with the plow when attaching or removing it from the vehicle. This kit should be used when installing the 29050 3-Port IM and 29056-1 kits on the 4-light Dodge Sport trucks. |
