

DUMP BODY AIR SHIFT CONSOLES

Put yourself in control with Muncie's new air controls for PTO and dump pump operation.

The compact air control provides feathering control for lowering the body. Center detent is standard for all models with detent options for raise, lower, or both. The PTO is engaged through finger tip control of a simple lever. You can choose either manual PTO disengagement or automatic (kick out) when the dump lever is placed into the lower position.

Quality consoles are designed for form, fit, and function, with choices like you've never seen before. Choose from short, tall, square, rectangular, compact, or "room to grow." Durable, attractive black powder coat provides a quality finish.

PRODUCT FEATURES
